In this article, we are going to see how to specify a fixed background image in CSS. To keep your background fixed, scroll, or local in CSS, we have to use the background-attachment property.

**Background-attachment:** This property is used in CSS to set a background image as fixed or scroll. The default value of this property is scroll.

Values of background-attachment property:

- **Scroll:** It is the default value for the background-attachment property. It is used to scroll the image with the background page.
- **Fixed:** The background image will not scroll. It is fixed with the page.
- **Local:** The background image will scroll with the content.

To keep your background image fixed, you have to use background-attachment property with the value Fixed.

<p>

For instance, in some styles of writing, particularly journalistic styles, a paragraph can be just one sentence long. Ultimately, a paragraph is a sentence or group of sentences that support one main idea.

Paragraphs are the building blocks of papers. Many students define paragraphs in terms of length: a paragraph is a group of at least five sentences,

a paragraph is half a page long, etc. In reality, though, the unity and coherence of ideas among sentences is what constitutes a paragraph.

A paragraph is defined as “a group of sentences or a single sentence that forms a unit” (Lunsford and Connors 116).
